PANTIN GENERAL STORES REFURBISHMENT

Pantin, France
Industrial (20th century)

Rehabilitation will probably be one of the main issues for European cities for the next decades. Located along the canal de l'Ourcq, originally built in 1930, is a massive building (135 x 35 m) that used to be a storage for grain and flours until its closure in 2000. After a transition period, the building has been bought by an advertising company to establish their headquarters including shops, restaurants, and a cultural space.
